Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: This invention relates to a system for reporting an emergency call from a mobile communication terminal to an appropriate one of the institutions, which includes police, hospital and bank. The emergency call includes position information that shows where the mobile terminal is, and is translated to a suitable language selected according to the position information before emergency institution receives it.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claims in combination with others. For example independent claim 1 has claim limitations such as locating the mobile terminal to generate position information by means for acquiring, sending the emergency call with the position information from the mobile terminal to a server computer, retrieving one of emergency institutions with reference to position information by the server computer, translating the information including the position information to a language determined with reference to the position information by the server computer, and sending the translated information to the emergency terminal of the retrieved emergency institution. Independent claims 10 and 19 have similar limitations as independent claim 1. For the above reasons independent claims 1, 10, 19, and dependent claims 2-9, 11-18, 20-27, are allowable.

2. Claims 1-27 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
